

CMTPI-2007

4rd International Symposium on Computational Methods in Toxicology and Pharmacology Integrating Internet Resources

INVITATION

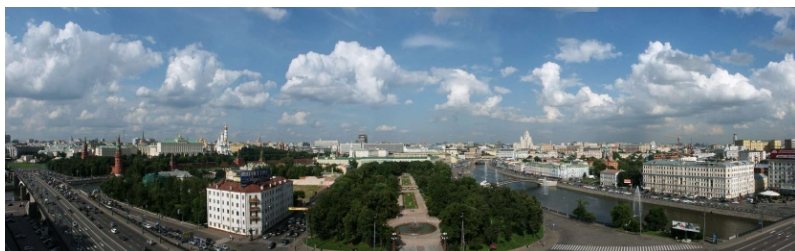

You are cordially invited to take part in the 4th International Symposium on Computational Methods in Toxicology and Pharmacology Integrating Internet Resources (CMTPI-2007). The meeting will be held in Moscow, Russia on September 1-6, 2007.

Following the traditions of CMPTI-2001 (Bordeaux, France), CMTPI-2003 (Thessaloniki, Greece) and CMTPI-2005 (Shanghai, China), CMTPI-2007 will provide an International forum for presentation and discussion, by both highly skilled professionals and young scientists, of recent progress and future trends in all aspects of Computational Methods in Toxicology and Pharmacology including the Internet resources.

Moscow, is a capital and, even more important, a familial heart of Russia. More than anywhere else in the country, it is in Moscow where the Soviet past collides with the capitalist future. Being scientific, business, cultural and historical center of the country, Moscow provides excellent opportunities for both scientific meetings and sightseeings. Kremlin, Bolshoy Theathre, Circus, Tretyakov and Pushkin Art Museums are just a few examples of "cultural pieces" of Moscow.

For those, who wish to get more Russia in September 2007, post-conference tour to St.-Petersburg will be organized.

Pre-registration at the CMTPI-2007 is open at the conference web-site:
